-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,728,031. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are anticipated by the claims of U.S. Patent No. 6,728,031. The patent teaches a screen for allowing light generated by a light source and modulated by a picture display device having pixels laid out to form a matrix to produce an image thereon to be projected on said screen as an enlarged picture, said screen comprising (patent claim 1 first subparagraph) a Fresnel lens sheet forming Fresnel lenses at an emission side of said light (patent claim 1 second subparagraph); a first member disposed for receiving light emitted from said Fresnel lens sheet (patent claim 1 third subparagraph) and having light passing windows formed at a light emission side of said first member (patent claim 1 fourth subparagraph), and a plurality of light absorbing layers each provided among said light passing windows (claim 1 fifth subparagraph); and a second member placed on said emission side of said first member (patent

claim 1 sixth subparagraph) and adhered to said first member (patent claim 1 eighth subparagraph); wherein a pitch of said absorbing layers formed on said first member is made smaller than a pitch in a first direction of pixels projected and enlarged on said screen from said image produced by said picture display device, and a pitch in a second direction of the pixels projected and enlarged on said screen from said image produced by said picture display device is at least twice of a pitch of said Fresnel lenses formed on said Fresnel lens sheet, the second direction being transverse to the first direction (patent claim 1 seventh subparagraph). The first direction is horizontal and the second direction is vertical (claim 1 seventh subparagraph). The first member includes lenticular lenses on the light incident side (patent claim 1 third subparagraph). A light scattering layer (patent claim 3) allows spreading of the light.

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/412,578, filed on October 5, 1999.
